

# Lucid Acoustics Sub 8w Installation Guide

Please Read Completely Before Starting Install

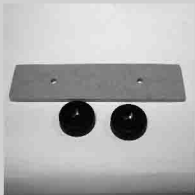

STEP 1: Your subwoofer is set up for wall mounting right out of the box. The metal strip at the top will be used to hang the sub like a picture frame.

STEP 2: Use the included bubble level with the wall bracket. Level and mount the bracket where you want to hang the subwoofer. When deciding take into account the dimensions of the Sub, needed cabling and power outlet.

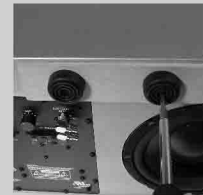

STEP 3: For almost all applications you will need to use the included 90° RCA adaptors so the wires can run under or behind the Sub with out interference.

STEP 4 : If you are using the Sub under a bed or similar location you will need to use the extra feet and spacer.

STEP 5: remove the existing wall hanging bracket from the subwoofer.

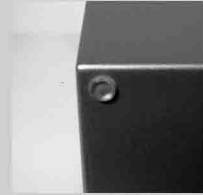

STEP 6: Using the same screws install the rubber feet and thin spacer where the wall bracket was removed.

STEP 7: When adapted for under furniture use the subwoofer should look like this on the bottom.

STEP 8: Lay the Sub on its belly and slide it under you furniture.

STEP 9: the subwoofer can be stood on end. this looks similar to wall mounting but with out mounting it on a wall. To do this attach 4 sticky feet on the edge that you want to rest on the floor.

STEP 10: When the Subwoofer is sat on end it should look like this.
